- YES NO N/A

Are wet spots, septic odors, or leakages observed near the system?

- YES NO

Does the system discharge water, or is there evidence of discharge?

- YES NO

Additional Observations or Comments:

REQUIREMENTS

All discharges from private sewage disposal systems which are discharged into, or have the potential to reach, any designated waters of the state or subsurface drainage tile shall be treated in a manner that will conform with the requirements of NPDES General Permit No. 4 issued by the Department of Natural Resources, as reference in 567—Chapter 64. Prior to the use of any system discharging to designated waters of the state or a subsurface drainage tile, a Notice of Intent to be covered by the NPDES General Permit No. 4 shall be submitted to the department. Systems covered by the NPDES General Permit No. 4 must meet all applicable requirements listed in the permit, including effluent sampling and monitoring. A copy of effluent sampling results shall be provided to Johnson County Public Health as an attachment to this application.

All private sewage disposal systems that discharge above the ground surface shall be annually inspected to ensure proper operation. Private sewage disposal systems that require a maintenance contract shall be inspected by a manufacturer's certified technician or person demonstrating knowledge of the system in accordance with the manufacturer's standards. Private sewage disposal systems that do not require a maintenance contract shall be visually inspected by a person with knowledge of the system for any malfunction and shall have the septic tank opened, inspected, and pumped if needed. A record of the inspection and any tank pumping shall be maintained and be made available to the administrative authority upon request.

I certify that, to the best of my knowledge, the information submitted with this application is correct and I agree to adhere to requirements of the Johnson County Operation Permit.
