Date of Report: December 1, 2020

Summary of Key Activities and Progress of Johnson County Decategorization Board

(Summarize the project's key activities and the progress toward reaching the project's desired outcomes during the previous FY20 state fiscal year)

In FY20 the Johnson County Decat Board included 11 members representing the Department of Human Services, Juvenile Court Services, Johnson County Board of Supervisors, United Way, domestic violence (DVIP), youth services (UAY), education (ICCSD), public health (JCPH), and community volunteers. The board met on a monthly basis, excluding July and December. The Contract Oversight Committee, which includes four board members, met on multiple occasions to monitor contracts and review grant proposals.

The Johnson County Decategorization Board entered into 16 contracts, plus CPPC, to provide services to youth and families in Johnson County at-risk of new or increased child welfare or juvenile court involvement. The dollar value of those contracts totaled \$202,437. The contractors expended \$163,532 of the grant funds awarded. Spending was less than expected as a result of necessary changes in service delivery due to the COVID-19 pandemic.

In FY20, the Johnson County Decategorization Board maintained the following Priority Service Areas to guide funding decisions:

Priority Service Areas

- Meet the needs of children and families currently involved in the child welfare system and/or juvenile court system paying particular attention to the needs of minority children and families.
- Address social isolation and mental health and trauma needs, and to build circles of support for children and families that are at-risk of involvement in the child welfare and/or juvenile court systems, paying particular attention to the needs of minority children and families.
- Promote positive youth development for youth ages 6 - 16 during out of school time, paying particular attention to youth most at risk for involvement with the child welfare or juvenile court services.

Proposals were solicited for the following services that align with the local priority service areas: positive youth development, Family Treatment Court support services, in-home family support services, and mental health and trauma needs. In addition, Johnson County Social Services administered contracts for wrap around services, professional development, and Juvenile Court interpretation services. There were 7 new contracts procured in FY20.

The Decat Board monitors contracts carefully. The Contract Oversight Committee receives each of the quarterly reports. Following the second quarterly report, the Committee carefully reviews for contract compliance and progress toward scope of services and performance measures. The Decat staff monitor progress and spending on a monthly basis. In FY20, presentations from three contractors as well as CPPC were provided to the Decat Board. In addition, Decat Board staff and board members completed three contractor site visits.

The Johnson County Decategorization Project solicited information from a variety of sources throughout the year to fulfill its obligations for planning and identification of needs. The activities utilized during FY20 included: discussion during regularly scheduled board meetings with individual service providers and key stakeholders, contractor presentations at the Decat board meetings, solicitation of information from a variety of local groups and coalitions and review of local child welfare and juvenile court services data. Additionally, the Empowerment Early Childhood Iowa Director and CPPC Coordinator provided updates to the board, along with the Juvenile Court and DHS supervisor. The Decat Coordinator is engaged in many community coalitions and groups; facilitating the Disproportionate Minority Contact Committee, coordinating CPPC activities (including Shared Decision-Making Team, Community & Neighborhood Networking), coordinating the Johnson County Juvenile Justice Youth Development Program and Policy Board, and supporting the Early Childhood Iowa Area Board.

The Board maintained the reduction of disproportionate minority contacts for children in both the child welfare and juvenile court systems, family support services and child mental health services as priority services. In FY20 programs funded with a primary or secondary goal of reducing disparities included G! World Girls Group, Dream Center RISE and BAM programs, translation services, LGBTQ support groups, and supplemental supervised visits. Mental health and supportive services were enhanced with the addition of a Young Father's group.

The Decat Board prioritizes increasing access to after-school and summer care for low income and at-risk youth and reducing isolation for families most in need. In FY20, 104 families received individual and/or group-based family support services funded by Decat. These supportive services assisted families with building community connections, identifying and accessing resources, and increasing parental skills. As a result of Decat funding, 392 youth participated in after-school/summer enrichment programming. In FY20, there were 202 group sessions, 1,394 individual sessions, and 75 court-based support sessions offered.

The Johnson County Decat Board is committed to funding programs that increase community supports for children and families and reduce the prevalence of out-of-home placements for children. The average daily population for Johnson County youth at Linn County Detention decreased 10.9% between 2013 -2017. In FY17 the average daily population was 3.58. The number of youth increased to 5.58/ day in FY18 and down to 4.28 in FY19. The average daily population during FY20 was 2.66, largely a result of decreased population due to COVID-19. The average daily population for the first 3 quarters of the year was 3.28, still a significant decrease from the previous two years.

Key Activities, Outcomes, and Expenditures

(Describe key activities, outcomes, and expenditures for programs and services that received funding from the governance board during the previous state fiscal year)

Outcomes Achieved by Funded Programs

Priority Service Area: Meet the needs of children and families currently involved in the child welfare system and /or juvenile court system paying particular attention to the needs of minority children and families.

Contract met 100% of Performance measures.</p>

Lessons Learned/Planning Adjustments

(Describe any lessons learned and planning adjustments made by the governance board during the previous state fiscal year)

Johnson County Decat, along with most of the state, experienced programming and planning adjustments during the 4th quarter of FY 2020 due to the COVID-19 pandemic. Many funded activities that previously took place in school buildings had to be reconfigured after those buildings closed mid-March. In the Iowa City Community School District, online learning from mid-March through May was optional for all except high school students. This made it more difficult for programs to contact youth participants and to conduct outreach. Consideration was given regarding safety and social distancing and agencies pivoted to providing more services in a virtual format. This switch to online programming highlighted issues of lack of available technology and access to broadband internet. Staff were creative in addressing student needs in this challenging time. One example is that United Action for Youth (UAY) continued to serve youth in art and music after-school programming via Facebook, Zoom and other platforms. Because they were able to serve multiple sites simultaneously, this opened up participation for additional students. With school-based programming, the art materials were typically provided by the schools. For virtual programming, UAY utilized available funds to purchase supply kits for each participating student and delivered them to their homes so that each student had the materials necessary to fully participate in programming.

The unpredictable nature of available Decat funding makes it difficult for both the Decat Board and partner agencies to plan and implement programming. Several years ago, in an effort to increase efficiencies and maximize services, the JC Decat Board prioritized fully funding projects whenever possible and dedicating fewer resources to smaller, piece-meal programs. Procuring and monitoring contracts is a staff-intensive task and is not cost effective for low dollar projects. However, the Board has been apprehensive about soliciting new, larger scale projects that require significant investment of time and resources to implement, given the uncertainty of future funding.

From the perspective of our partner agencies, few organizations are responding to notices of funding requests for smaller scale projects. The administrative costs to solicit and implement new projects often exceed the value of the potential grant. Staff resources are very lean and agencies lack the capacity to take on new projects without hiring additional staff. Many organizations are not interested in conducting a hiring search for part-time, potentially short-term employment (an added cost to the organization). As a result, there are fewer responses to solicitation of proposals. The board continues to evaluate ways to help facilitate the utilization of Decat funding to meet the growing needs within our community while also preserving existing programs that have proven effective in serving vulnerable children and families.

Johnson County is fortunate to have an engaged and knowledgeable Decat Board that represents many disciplines. The board carefully reviews community needs while communicating with partner organizations and monitoring contracted programs. The board is mindful of funding priorities and intentional about distributing funding based on the identified priority areas while placing emphasis on services that are evidence-based and proven effective. Johnson County Decat has effective communication with other local initiatives including Community Partnerships for Protecting Children, Early Childhood Iowa, Juvenile Justice & Youth Development, and Prevent Child Abuse-Johnson County. This helps to identify gaps and increase effectiveness of local funding.
